

Golf Outing Event Software

Automates Player Check-In & CC Capture, Increases Event Day Revenues,
Streamlines Auction Check-Out and Enhances Player Experience.

EVENT SOFTWARE

Many of Great Golf Events' clients have implemented this Event Software to streamline check-in - while capturing each player's credit card information. Since credit cards are captured at check-in, players never reach into their wallets during the event - they simply identify themselves with their unique VIP number assigned to them at check-in. The implementation of this software significantly increases event-day revenues; streamlines silent and live auction check-out; and facilitates all the accounting for tracking sales & generating receipts. Bottom-line, having each player's credit card on-file makes it easier for them to spend and enhances their event-day experience.

Live Demonstration Available Upon Request

Training and Support are handled by both Greater Giving (*the developer of the software*) and Great Golf Events. Multiple training sessions and videos are provided by Greater Giving – while Great Golf Events prepares the software for pre-event training and event-day check-in.

Pre-Event Services

- Set-Up of Trial Event for Volunteers Training.
- Loading all Pre-Defined Sales Items into Software.
 - Raffle Tics, Mulligans, VIP Package, Silent Auction Items, On-Course Games, etc.
- Training Volunteers on Test Event Software.
 - Same Look & Feel as Live/Event-Day Software.
- Loading Pairings Data into Live/Event-Day Software.

Event Day On-Site Support Options

1. Single Support Person (Great Golf Events)
2. Multiple Great Golf Events' Staff Members.
 - Facilitate and Manage Check-In & Post Event Administration.
 - Eliminates all Training & Volunteers.
3. Roger Caldwell (Golf Trick-Shot Entertainer)
 - Support Software at Check-In and Post Event.
 - Entertain Guests During Play & Facilitate Cash Game Raise Money for Charity.

For first time users, many of our clients request someone from our staff (with knowledge of the software) onsite during event-day. Other clients feel comfortable enough with the pre-event training that they require no onsite support at all. As outlined above, we have multiple option for your desired support and training needs.
